

Don Roemer
 Owner,
 Cascade Metal Recycling
 Grant's Pass, Oregon

**“Thanks to Al-jon efficiency
 we make a decent living -
 in spite of low scrap prices.”**

“Replacing our old machines with an Al-jon 580CL and 400XL put us in a great position to get through this market downturn,” explains Don.

Cascade’s annual processing for an out-of-town customer demonstrates Al-jon’s unmatched efficiency. “It used to take us two and one half weeks to prep, crush, load and net 600 tons. Now we’re out of there in seven days.”

“Getting the job done was once 10% machine and 90% operator,” he explains. “But it’s the other way around with Al-jon. Our operators don’t have to beat their brains out trying to keep up with waiting trucks.”

“Our 580CL can bale a solid 150 tons of white goods in a single day. Or 200 tons of cars. And we don’t have to net the bundles for transport.” In today’s market, that’s squeezing the most efficiency out of every day.
