Smitty's Incorporated  
Axtell, Kansas

## **"We loved our old Al-jon 580CL. But our new one is faster and uses less fuel."**

The best keeps getting better. "Now, we can bale a big 25-ton semi-load of cars every 30 minutes," Rick reports. "It puts more material through and yet, saves 10 gallons of diesel every day. Amazing!"

"Our 580CL is the biggest, toughest machine they could make portable. It's a wonderful balance between strength and weight savings to stay highway legal."

Rick previously bought an old, abused Al-jon LC-90 and a "scratch and dent" 580CL at low cost. He credits Al-jon for helping bring them up to excellent working condition. "We ask questions right down to metallurgy and sometimes even request blueprints. Anything we need, Al-jon provides."

His company's success with the old machines allowed him to buy a new 580CL. Its speed and efficiency gives Rick the power to make more profit every day.
